

Recent Updates & Fixes (Changelog)

Here is a summary of everything that has been implemented to streamline and improve your app recently!

Bug Fixes

- **The "Invincible Hunger" Sync Bug:** Fixed a massive issue where downloading your cloud save from Supabase was secretly overwriting and reversing the local 8-hour time checks. Your pet will now properly decay over time as intended!
- **Floating-Point Coin Display:** JavaScript math is notoriously messy. Fixed a bug where buying berries resulted in infinite decimals like `11.299999999999997` 🏠. Your coin balance is now strictly rounded to 2 decimal places maximum everywhere in the app.
- **Rank Modal Dark Mode:** Discovered that the "Rank Milestones" popup was using hardcoded light styles. I migrated those to proper CSS classes (`.rank-milestones-container`) so it now effortlessly inherits your dark theme.

Quality of Life Improvements

- **Pokedex "Current Pet" Highlight:** Replaced the generic "Set as Pet" button with a highly visible `Current Pet` badge for the Pokémon you currently have equipped. Equipping new pets now magically updates the grid in real-time without an annoying popup alert.
- **Berry Shop Revamp & Sorting:** Completely overhauled the berry pricing and stats using a backend script to ensure every berry has unique stats, and the shop is elegantly sorted from lowest cost to highest within each rarity tier.

Economy & Balance Tweaks

- **Coin Reward 4x Buff:** Because prices were adjusted, the foundational base coin reward multiplier has been drastically boosted from `1.0` (for Habits) and `1.5` (for Tasks) to a unified `4.0`. You will earn considerably more coins now!
- **Dynamic Hunger Decay System:** As per the approved implementation plan, pet hunger decay is no longer a random dice roll. It is a calculated penalty system where your pet's hunger represents *your* productivity:
 - Base passive decay: `-2%` per 8 hours
 - Tasks punish based on Priority (`-3%` to `-8%`)

- Habits punish based on Streak leniency (The longer your streak, the more forgiving the penalty).
